In re Patent Application of:  
Ray Naeini et al.

Application No.: 10/688,327

Confirmation No.: 2312

Filed: October 17, 2003

Art Unit: 2617

For: SYSTEM AND METHOD FOR MULTI-  
PLATFORM, MULTIMEDIA  
INFORMATION AND COMMUNICATION  
NETWORK-INDEPENDENT SERVERS

---

Examiner: S. T. Zewari

**REQUEST FOR CERTIFICATE OF CORRECTION  
PURSUANT TO 37 CFR 1.322**

Attention: Certificate of Correction Branch  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Dear Sir:

Upon reviewing the above-identified patent, Patentee noted typographical errors and amendment errors which should be corrected.

In the claims:

Column 9, Line 46, delete "sewer" and replace with --server--.

Column 10, Line 63, delete "(MEN)" and replace with --(MIN)--.

In the specification:

Column 3, Line 44, delete "and".

Column 3, Line 45, delete "flowchart" and replace with --diagram--.

Column 3, Line 46, delete "invention." and replace with --invention; and--.

Column 3, Line 47, before the paragraph beginning with "FIG. 4 is a flowchart illustrating another", insert the following: --Figure 4 is a flowchart illustrating an example operation of a preferred embodiment of the present invention.--

Column 3, Line 47, remove the entire text beginning with "FIG. 4 is a flowchart illustrating another" to and ending "terminals with a message." in column 4, line 6 and re-insert the entire text before the paragraph in column 6, line 53 beginning with "It should be appreciated".

The Preliminary Amendment (a copy is enclosed herewith) mailed October 17, 2003, reflects the above mentioned amendments to the specification and the errors found in the claims are of a typographical nature. These errors were not in the application as filed by applicant, rather, incorrectly transcribed to the Letters Patent; accordingly no fee is required.

These errors do not constitute new matter nor require further examination. Therefore, transmitted herewith is a proposed Certificate of Correction effecting such amendment. Patentee respectfully solicits the granting of the requested Certificate of Correction.

The Director is hereby authorized to charge any deficiency in the fees filed, asserted to be filed or which should have been filed herewith (or with any paper hereafter filed in this application by this firm) to our Deposit Account No. 06-2380, under Order No. 47524/P109C1/10313546.

Dated: September 6, 2007

Respectfully submitted,

By

**PRELIMINARY AMENDMENT**

MS Patent Application  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Dear Sir:

**INTRODUCTORY COMMENTS**

Prior to examination on the merits, please amend the above-identified U.S. patent application as follows:

**Amendments to the Specification** begin on page 2 of this paper.

**Amendments to the Claims** are reflected in the listing of claims which begins on page 4 of this paper wherein claims 1-42 are cancelled and new claims 43-95 are introduced.

**Amendments to the Drawings** begin on page 14 of this paper wherein replacement sheets for FIGURES 1, 2, and 3 are included, and new FIGURE 4 is introduced.

**Remarks/Arguments** begin on page 15 of this paper

**AMENDMENTS TO THE SPECIFICATION**

Please insert the following new heading and paragraph on page 1 of the specification before the words "TECHNICAL FIELD:"

**CROSS-REFERENCE TO RELATED APPLICATIONS**

This application is a continuation of pending U.S. Patent Application Serial No. 09/514,833 filed February 28, 2000 entitled "SYSTEM AND METHOD FOR MULTI-PLATFORM, MULTIMEDIA INFORMATION AND COMMUNICATION NETWORK-INDEPENDENT SERVERS," the disclosure of which is hereby incorporated herein by reference.

Please insert the following paragraph on line 11 of page 7 after the paragraph on line 9 of page 7 beginning with "FIGURE 3 is a diagram."

FIGURE 4 is a flowchart illustrating an example operation of a preferred embodiment of the present invention.

Please insert the following paragraph on line 11 of page 12 before the paragraph on line 11 of page 12 beginning with "It should be appreciated."

FIGURE 4 is a flowchart illustrating another example of an application of a preferred embodiment of the present invention. Method 400 illustrates a method for providing multimedia data services. In step 401, a server is associated with a plurality of user terminals over a communication network. Step 401(a) indicates optional services whereby the server may provide messaging services related to the user terminals. These messaging services may comprise automatically sending notification signals to user terminals when a server receives a message relating to user terminals and sending messages to a user terminal in response to a request sent by that user terminal. These user terminals may use the server to access functions of a home system that are available to the user terminal only through the use of a server. In step 402, communication information is received from at least one of the user terminals. After receiving the communication information, various

applications are accessed in step 403. Step 403(a) indicates optional services where the server may determine which applications to run by accessing user memory or the server may automatically access one or more applications based on sender identification data contained in a message. After accessing an application, the information obtained by the various applications is then sent to the user terminal in step 404, and step 404(a) indicates an optional service where the communication data processed or obtained by an application may be sent to some user terminals with a message.
